# • Appreciation

Merci beaucoup to Mr Andy for all the precious knowledge, guidance and time that you gave to us about this career and lots of important things that we as a youngster will ever think.

There are no words to describe all the hospitality provided to us during the internship.

Really enjoyed being an interns here. Although the time is kind of crazy packed during the training, we still enjoy it because of all the extra energetic yet interesting programme held by company.

Last but not least to all my intern-mates and kak Farah that have been stuck with me through this whole month, no words can describe how thankful I am to meet you guys since day 1 and really hope that this friendship will last forever and we can be successful together soon.

This one month training made me change my thinking pattern to always think positive and always have the courage to give yourself a try and take whatever risk that worth a meaningful success.

The background is black with four yellow wireframe geometric shapes. One is a large triangle on the left, one is a large triangle on the right, one is a small triangle at the top center, and one is a small triangle at the bottom right.
